

Career opportunity: Frontend Developer

About Wolters Kluwer Financial Services

In Wolters Kluwer's Financial Services business unit we possess deep insight into the industry, providing governance, risk and compliance programs and solutions to more than 15,000 financial services organizations worldwide. More than 400 in-house experts - former regulators and compliance officers, risk analysts, lawyers and financial industry specialists - embed their knowledge and expertise in every service or solution so that financial organizations can be confident they are managing their organization's Finance, Risk and Regulation needs effectively. Despite rapidly changing industry conditions, financial organizations can rest assured knowing that Wolters Kluwer is able to invest and quickly respond to market needs, with financial stability for the long term.

Wolters Kluwer N.V. (AEX: WKL) is a global leader in information services and solutions for professionals in the health, tax and accounting, risk and compliance, finance and legal sectors. We help our customers make critical decisions every day by providing expert solutions that combine deep domain knowledge with specialized technology and services.

Wolters Kluwer reported 2015 annual revenues of €4.2 billion. The company, headquartered in Alphen aan den Rijn, the Netherlands, serves customers in over 180 countries, maintains operations in over 40 countries and employs 19,000 people worldwide.

Wolters Kluwer shares are listed on Euronext Amsterdam (WKL) and are included in the AEX and Euronext 100 indices. Wolters Kluwer has a sponsored Level 1 American Depositary Receipt program. The ADRs are traded on the over-the-counter market in the U.S. (WTKWY).

Job Description

Currently we are looking for a Frontend Developer for our Cluj-Napoca office

Your responsibilities:

- Develop user interfaces having high quality and respecting deadlines, following the agreed procedures & conventions
- Perform product analysis and development tasks of increasingly complex nature which may require extensive research and analysis
- Writing tested and documented JavaScript, HTML and CSS
- Contribute to the design and technical decisions of the frontend
- Willing to help develop the REST layer (using Java/JEE) used by the front-end application
- Create e2e test suites for components
- Focus on quality and performance
- Perform peer and formal code reviews
- Mentor and coach junior staff

Essential qualifications and competencies

- BS/MS degree in Computer Science, Engineering or a related field
- Proficiency with JavaScript and HTML5
- Strong expertise with HTML, CSS, and writing cross-browser compatible code
- Experience with creating custom, general use modules and components and UI widgets based on a major JS UI framework (Angular JS, Ext JS, etc.)
- Experience with RESTful services
- Experience in working in an Agile way (SCRUM)
- Team player with good communication skills (written and oral)
- Assertive and results driven
- Can-do mentality, while acting as a continual improvement role model
- Fluent in English

Nice to have competencies

- Experience with JavaScript build tools like webpack, NPM scripts, Grunt
- Experience with TypeScript
- Experience with AngularJS / Angular 2+ / Ext JS
- Experience with migration from AngularJS to Angular 2+
- Familiar with Protractor
- Experience with CSS preprocessors like Sass and LESS
- Good knowledge of Java API
- Experience with Object Oriented analysis and design using common design patterns
- Hands-on experience with major web/application servers (WildFly / JBoss / WebSphere)
- Database modelling experience
- JUnit, Mockito, DBUnit, Selenium WebDriver, Cucumber
- Maven
- JIRA, Confluence
