## Job Description

For our offices in the UK, we are currently looking for a Functional Banking Consultant. The Functional Banking Consultant is responsible for the analysis of the customer's needs, the translations into functional specifications, functional conception of the system, evaluation and follow-up of the implementation.

This person will be based in the UK and could be expected to travel for projects based abroad.

Your responsibilities:

- You will participate in implementation projects by providing functional expertise through specialized workshops on regulatory reporting, banking and financial products. Clients are

located locally and internationally and projects may also be part of a multi country implementation.

- You will contribute to pre-sales and marketing activities such as product demonstration, RFI, RFP as well as address business and regulatory issues raised during meetings.
- You will be working on a project-based implementation mostly at the client's site, you will assist the customer in defining and analysing his requirements, translate the client's requirements into functional specifications, implement and test our solutions and assure a constant follow-up and evaluation.
- You will subsequently play an advisory role towards our clients. You will use the knowledge and expertise acquired through the different projects by advising on our standard and/or customized solutions.
- You will gradually become the first contact point of the customer for functional related (content) questions.
- You will report to the project manager of the project you are allocated to.
- You will be responsible for the quality of the functional part of the implementation, including the implementation work done by yourself and by the junior functional consultants.
- You will work closely together with the end user and give trainings in order to guarantee a smooth handover of the implemented software modules.
- You will deliver input to your project manager regarding all project related items for your area (e.g. planning, progress, deliverables, risk & issues...).
- You will participate in status meetings where you will report on progress made.

## Qualifications and Skill Set

- Master's degree in Economics, Business Economics, Business Engineering and/or specialization in Banking and Finance.
- Knowledge about general and sub ledger systems, accounting and risk management in a banking context.
- Understanding of banking regulation such as IFRS (IFRS 9).
- Bonus points if you have IAS (IAS 32, IAS 39) knowledge.
- Experience with SQL is a plus.
- Knowledge of Regulatory Reporting for banking is an asset.
- Team player.
- Able to give presentations.
- Good knowledge of Microsoft tools.
- Written and oral fluency in English is mandatory, all other languages are a plus.

## Personality / Personal traits

- Good team player with excellent communication skills
- Attention to detail and organized way of working
- Quick learner
- Demonstrating initiative when necessary, hands-on and committed to success

## Our offer

We offer you a position in a team-based, international, leading financial organization. Within Wolters Kluwer Financial Services, you will find straightforward communication, a fast-paced work environment and challenging projects. Your know-how will be rewarded with interesting career opportunities and a competitive salary package.
